

Welcome all fellow  
eye care practitioners  
for a CME programme  
on 'Current concepts in Oculoplasty'.

Dear Friends,

Oculoplasty is one of the fastest evolving sub-specialties in ophthalmology. New understanding of the ocular adnexal tissues leads to the shift towards functional procedures, performed with attention to aesthetics and aesthetic procedures done with attention to function.

We all want the best care for our patients. Our patients know what is available world-wide and expect the best.

We are happy to welcome you to a Continued Medical Education programme on the ever-widening scope of oculoplastic procedures, with the best of National faculty, and BOS faculty.

**Hot Topics:** Ocular adnexal tumors and reconstruction | Thyroid eye disease | The aging eye | Use of Botulinum toxin | Socket management

**Date:** Sunday, July 15th 2012 | **Timing:** 9 am to 5 pm | **Venue:** Hotel La Marvella, Southend Circle, Bengaluru

With Regards,

Roshmi Gupta  
(Organising Secretary)
