*Inaugurating* **RETINA PHYSIOLOGY LAB**

This unique laboratory, one of its kind and the first in Asia, consists of all the commercially available technology required to study the structure and function of the neurosensory retina.

***It comprises***

1. Adaptive Optics retinal imaging (rtx1-Imagine Eyes)
2. Hand held Spectral- domain Optical coherence tomography (Biotigen)
3. Macular integrity assessment (MAIA)
4. Macular pigment optical densitometry (MPOD, Tinsley, UK)
5. Electrophysiology (VERIS Science)
6. Simultaneous retinal angiography and Spectral- domain Optical coherence tomography (Spectralis, Heidelberg)
7. Genes, Repair&Regeneration Ophthalmic Workstation(GROW)- includes proteomics, genomics and stem cell research

**Registration is complimentary, but pre-registration is MANDATORY**
